Germs can be found in all areas of your home, such as tabletops and bathrooms, and also around food and pets. Germs can also be found in the air and on your skin, especially on the hands. Most of the germs that live in the air or on your skin will not hurt you. Some germs, if allowed to enter the bloodstream, could cause an infection or serious illness.

### Alcohol-Based Rubs

1. Apply the gel product to the palm of one hand (read the label to learn the correct amount).
2. Rub your hands together.
3. Rub the gel over all the surfaces of your hands and fingers until your hands are dry. This should take around 20 seconds

### Washing Hands with Soap and Water

1. Wet your hands with clean, running water (warm or cold), turn on the tap, and apply soap.
  2. Lather your hands by rubbing them together with the soap. Lather the backs of your hands, between your fingers, and under your nails.
  3. Scrub your hands for at least 20 seconds. Need a timer? Hum the "Happy Birthday" song from beginning to end twice.
  4. Rinse your hands well under clean, running water.
  5. Dry your hands using a clean towel or air dry them.
- ### Proper Respiratory Hygiene/Cough Etiquette
1. Cover mouth and nose when sneezing/coughing.
  2. Use tissues and dispose immediately in a receptacle.
  3. Observe hand hygiene after soiling of hands with respiratory secretions.
  4. Wear a surgical mask to prevent spread of respiratory secretions.
